Subject index

Acentric fragments,
micronuclei, X-rays, dose–response parameters, cytokinesis, cytochalasin B, human lymphocytes 265
Acrylate/methacrylate compounds,
genotoxicity, L5178Y mouse lymphoma cells 381
Adaptive response,
chromosomal aberrations, X-irradiation, human lymphocytes 87
Lactococcus (Streptococcus) lactis, *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine 280
***n*-alkanals,**
lipid peroxidation, mutagenicity, V79 Chinese hamster cells 277
3-aminobenzamide,
bleomycin, X-rays, chromosome damage, adaptive response, blood lymphocytes 187
2-amino-3-methylimidazo (4,5-*f*)quinoline,
enhances its own activation, mutagenicity 205
2-aminopurine,
DNA methylation, mismatch repair, mammalian cells 302
Anaesthetics,
chromosome analysis in operating room personnel 95
Aneuploidy,
aneugens, clastogens, bone marrow micronucleus assay, vincristine sulphate, nocodazole, EMS, cyclophosphamide, mouse 6
DNA probes, *in situ* hybridization, chromosomes 165
somatic aneuploidy, cytogenetics, sex differences, diethylstilboestrol, mouse bone marrow cells *in vivo* 62
spindle poisons, c-mitotic effects, chromosome aberrations, mouse bone marrow cells 208
Antibiotics,
carbenicillin, penicillin VK, β-lactam antibiotics, ampicillin, clastogenicity 439
Antimutagenicity,
betel quid, *N*-nitrosamines, tobacco 154
Antiparasitics,
nifurtimox, 5-nitrofurans, genotoxicity testing, Drosophila wingspot test 105
Ascorbic acid,
cyclophosphamide, co-administration, clastogenicity, preimplantation murine blastocysts, mouse 297
Ataxia telangiectasia,
SOS-like responses, impaired recovery, DNA damage, radiosensitive fibroblasts 271
Azido-imidazoarenes,
nitrenes/nitrenium ions, mutagenicity, structure–activity relationships, *Salmonella typhimurium* 446
Azo dyes,
structure–activity relationships, mutagenicity, *Salmonella typhimurium* 115

Bacterial assays,
bacterial growth stage, reversion, captan, folpet, Ames test, *Salmonella typhimurium* TA100 1
BALB/c 3T3 cells,
short-term genotoxicity tests, transformation/mutation assay system, *in vitro* testing, non-genotoxicity, carcinogens 286
Betel quid,
antimutagenicity, *N*-nitrosamines, tobacco 154
Bleomycin,
3-aminobenzamide, X-rays, chromosome damage, adaptive response, blood lymphocytes 187
Bone marrow micronucleus assay,
aneuploidy, aneugens, clastogens, vincristine sulphate, nocodazole, EMS, cyclophosphamide, mouse 6
triple dose study, stains, Acridine Orange, Giemsa, mouse 477

Carcinogenicity,
genotoxicity, genotoxic/non-genotoxic mechanisms, chemical screening, tumour promotion 407
mutagenicity testing, mammalian cell mutation assays, letter to the Editor 325
non-genotoxicity, BALB/c 3T3 cells, short-term genotoxicity tests, transformation/mutation assay system, *in vitro* testing 286
prediction of, Bayes' Theorem 241
prediction of, Bayes' Theorem 242
Chlorine,
sodium hypochlorite, monochloramine, water, clastogenicity, micronucleus test, newt larvae (*Pleurodeles waltl*) 170
CHO mutant UV61,
UV-irradiation, (6-4)photoproducts, cyclobutane dimers 140
Chromosomes,
chromosomal aberration assay, cytogenetic assays, cultured rat lymphocytes, *in vitro* 147
chromosomal mutations, quantitation, mouse lymphoma *tk* locus, CHO *hgprt* locus 394
chromosome aberrations, aneuploidy, c-mitotic effects, spindle poisons, mouse bone marrow cells 208
chromosome aberrations, clastogenicity, transmissibility, melphalan, human lymphocytes 133
chromosome analysis, anaesthetics, operating room personnel 95
chromosome damage, adaptive response, bleomycin, 3-aminobenzamide, X-rays, blood lymphocytes 187
chromosome loss, kinetochore detection, micronuclei 98
Cigarettes,
non-tobacco cigarettes, genotoxicity, carcinogenicity 377
Clastogenicity,
carbenicillin, penicillin VK, β-lactam antibiotics, ampicillin 439
chromosome aberrations, transmissibility, melphalan, human lymphocytes 133
co-administration, ascorbic acid, cyclophosphamide, preimplantation murine blastocysts, mouse 297
ethylating agents, comparative study, CHO cells 432
water, chlorine, sodium hypochlorite, monochloramine, micronucleus test, newt larvae (*Pleurodeles waltl*) 170
Coffee,
cytogenetics, CHO AUXB1 cells, human peripheral lymphocytes 343
Complementation groups,
DNA repair, CHO mutants, screening, UV-sensitivity 349
Cooked meat,
lamb, time and temperature effects, mutagenicity, *Salmonella typhimurium* TA98, S9 mix 228
Crown ethers,
genotoxicity, mutations, *Salmonella typhimurium* 437
Cyclophosphamide,
ascorbic acid, co-administration, clastogenicity, preimplantation murine blastocysts, mouse 297
L-cysteine,
glutathione, active oxygen species, mutagenicity spectra, *Salmonella typhimurium* strains 221
Cytogenetics,
coffee, CHO AUXB1 cells, human peripheral lymphocytes 343
cytogenetic assays, chromosomal aberration assay, *in vitro*, cultured rat lymphocytes 147
cytogenetic damage, pyrethroid insecticides:cypermethrin/fenvalerate, cultured human lymphocytes 72
cytogenicity, DNA lesions, sister-chromatid exchange, naphthofurans, human lymphocytes 27
somatic aneuploidy, sex differences, diethylstilboestrol, mouse bone marrow cells *in vivo* 62

Data Base Section,
Editorial 81
Diethylstilboestrol,
cytogenetics, somatic aneuploidy, sex differences, mouse bone marrow cells *in vivo* 62
Diethylsulphate,
micronucleus test, kinetochores, Chinese hamster V79 cells 174
Dimethylnitrosamine,
mutagenicity, ellagic acid, Ames test, S9 activity, hamsters 454
Dimethylsulphate,
mutational specificity, DNA alkylation pathways, S_N1 and S_N2, *lac I* gene, *Escherichia coli* 230
DNA,
DNA adduct formation, mutagenicity, metabolic activation, 6-nitrochrysene, *Salmonella typhimurium* 235
DNA adduct formation, 7-methoxy-2-nitro-naphtho[2,1-*b*]-furan, metabolic activation, *Escherichia coli* 254

DNA adducts, 1,N^6-ethenodeoxyadenosine, 3,N^4-ethenodeoxycytidine, ^{32}P-postlabelling, HPLC 75
DNA alkylation pathways, S_N1 and S_N2, mutational specificity, dimethylsulphate, *lac I* gene, *Escherichia coli* 230
DNA damage, nucleoids, mutagenicity testing, flow cytometry, genotoxins, human mononuclear cells 35
DNA damage, SOS Chromotest, mutagenicity testing, urine samples, smokers, *Escherichia coli* strain PQ37, human 51
DNA methylation, mismatch repair, 2-aminopurine, mammalian cells 302
DNA photodamage, porphyrins:*in vivo* uptake in *Allium cepa* meristematic cells, photodynamic therapy 157
DNA probes, *in situ* hybridization, aneuploidy, chromosomes 165
DNA repair, complementation groups, CHO mutants, screening, UV-sensitivity 349
DNA repair induction, UV irradiation, genotoxicity, metabolic activation, rat hepatocytes 457
DNA repair, mutagenicity, genotoxicity, plasmid pKM101 371
error-prone DNA repair, *Escherichia coli* K-12, Ames *Salmonella typhimurium* strains, model alkylating agent 90
methylation, mismatch repair, mutation, error correction, tumour development, SCC30 cell line 463
repair and replication, unscheduled DNA synthesis, UV-irradiation, smokers, *in vitro*, lymphocytes 82

Dose–response parameters,
X-rays, cytokinesis, cytochalasin B, acentric fragments, micronuclei, human lymphocytes 265

Ellagic acid,
dimethylnitrosamine, mutagenicity, Ames test, S9 activity, hamsters 454

Erythrocytes,
classification of erythrocytes, fetal erythrocytes, micronucleus assay, RNA staining, Hoechst 33258, pyronin Y 190

Erythropoeisis,
micronucleus test, polychromatic and normochromatic erythrocytes, P/N ratio, bone marrow toxicity, mice 420

Ethyl acrylate,
inactivity, micronucleus assay, bone marrow, mouse 283

Ethylating agents,
clastogenicity, comparative study, CHO cells 432

Ethylene oxide,
gamma radiation, *in vitro* transformation, comparative studies, genotoxicity, C3H/10T1/2 mouse embryo fibroblasts, human 58

γ-fagarine,
furoquinoline alkaloids, genotoxicity, SCE assay, human lymphocyte cultures, *Ruta graveolens*, Rutae Tinctura 468

Fanconi's anaemia,
psoralen, herpes simplex virus, DNA cross-linking compounds, multiplicity reactivation, mutagenesis 67

Flavonoids,
heterocyclic amines, genotoxicity, BALB/c mice 365

Flow cytometry,
mutagenicity testing, DNA damage, nucleoids, genotoxins, human mononuclear cells 35

Fluctuation tests,
heterogeneity, mutagenicity testing, auxotrophic-growth enhancement, faeces, *Salmonella typhimurium*, *Escherichia coli* 126

Formaldehyde,
genotoxicity testing, *in vivo*, micronuclei, nuclear anomalies, gastro-intestinal epithelium, rats 327

Furans,
arenofuran derivatives, genotoxicity testing, phage T7 inactivation test 472

Gamma radiation,
dose rate, *in vivo* mutation assay, DNA repair, mouse intestine 404
ethylene oxide, *in vitro* transformation, comparative studies, genotoxicity, C3H/10T1/2 mouse embryo fibroblasts, human 58

Genotoxicity,
acrylate/methacrylate compounds, L5178Y mouse lymphoma cells 381
carcinogenicity, non-tobacco cigarettes 377
crown ethers, mutations, *Salmonella typhimurium* 437
DNA repair induction, UV irradiation, metabolic activation, rat hepatocytes 457
genotoxic/non-genotoxic mechanisms, carcinogenesis, chemical screening, tumour promotion 407
genotoxicity testing, furans, arenofuran derivatives, phage T7 inactivation test 472
genotoxicity testing, *in vivo*, micronuclei, nuclear anomalies, gastro-intestinal epithelium, formaldehyde, rats 327
genotoxicity testing, 5-nitrofurans, nifurtimox, antiparasitics, Drosophila wingspot test 105
heterocyclic amines, flavonoids, BALB/c mice 365
mitomycin C, tubulin assembly, chromosomal malsegregation, *Saccharomyces cerevisiae* D61.M, porcine brain 39
mutagenicity testing *in vitro*, metabolic activation, liver S9 microsomes, mice 335
mutagenicity, plasmid pKM101, DNA repair 371
precocene II, Drosophila wing spot test 216
procarbazine, deuterated analogues, *Salmonella typhimurium*, rats 355
water screening, micronucleus test, *Pleurodeles waltl* 17
γ-fagarine, furoquinoline alkaloids, SCE assay, human lymphocyte cultures, *Ruta graveolens*, Rutae Tinctura 468

Glucose-6-phosphate dehydrogenase (G6PD),
G6PD-deficient mutants, isolation and characterization, mutations, Chinese hamster cells 259

Glutathione,
L-cysteine, active oxygen species, mutagenicity spectra, *Salmonella typhimurium* strains 221

GUM,
Gesellschaft für Umwelt-Mutationsforschung, abstracts of papers presented at the 11th meeting, Mainz, FRG 306

Hepatoma cells,
H4IIEC3, resistance, DNA repair, *N*-nitrosodimethylamine, genotoxic products, rat 292

Heterocyclic amines,
flavonoids, genotoxicity, BALB/c mice 365

Human food screening,
mutagenicity, mushroom:*Tirmania pinoyi*, extracts, different solvents, Salmonella strains 111

Hydroxychavicol,
an anti-nitrosating phenolic compound, betel leaf 200

***in vivo*,**
mutation assay, gamma radiation, dose rate, DNA repair, mouse intestine 404

Kinetochores,
kinetochore detection, micronuclei, chromosome loss 98
micronuclei, diethylstilboestrol, colchicine, benomyl 425
micronucleus test, diethylsulphate, Chinese hamster V79 cells 174

Mammalian cell mutation assays,
mutagenicity testing, carcinogenicity testing, letter to the Editor 325

Melphalan,
clastogenicity, chromosome aberrations, transmissibility, human lymphocytes 133

Metabolic activation,
mutagenicity testing *in vitro*, genotoxicity, liver S9 microsomes, mice 335

7-methoxy-2-nitro-naphtho[2,1-*b*]furan,
metabolic activation, DNA adduct formation, *Escherichia coli* 254

***N*-methyl-N′-nitro-*N*-nitrosoguanidine,**
adaptive response, *Lactococcus (Streptococcus) lactis* 280

Micronuclei,
a workshop sponsored by the DHSS, meeting report 483
acentric fragments, X-rays, dose–response parameters, cytokinesis, cytochalasin B, human lymphocytes 265
kinetochore detection, chromosome loss 98
kinetochores, diethylstilboestrol, colchicine, benomyl 425
micronucleus test, classification of erythrocytes, fetal erythrocytes, RNA staining, Hoechst 33258, pyronin Y 190
micronucleus test, erythropoeisis, polychromatic and normochromatic erythrocytes, P/N ratio, bone marrow toxicity, mice 420
micronucleus test, genotoxicity, water screening, *Pleurodeles waltl* 17
micronucleus test, inactivity, ethyl acrylate, bone marrow, mouse 283
micronucleus test, kinetochores, diethylsulphate, Chinese hamster V79 cells 174

micronucleus test, newt larvae (*Pleurodeles waltl*), clastogenicity, chlorine, sodium hypochlorite, monochloramine, water 170
micronucleus test, water screening, mutagens, *Xenopus laevis* 12
Mismatch repair,
DNA methylation, 2-aminopurine, mammalian cells 302
Mitomycin C,
tubulin assembly, chromosomal malsegregation, genotoxicity, *Saccharomyces cerevisiae* D61.M, porcine brain 39
Monosomies,
mutations 487
Multiplicity reactivation,
mutagenesis, psoralen, DNA cross-linking compounds, Fanconi's anaemia, herpes simplex virus 67
Mushroom,
Tirmania pinoyi, extracts, different solvents, mutagenicity, Salmonella strains, human food screening 111
Mutagenesis,
multiplicity reactivation, psoralen, DNA cross-linking compounds, Fanconi's anaemia, herpes simplex virus 67
Mutagenicity,
n-alkanals, lipid peroxidation, V79 Chinese hamster cells 277
azido-imidazoarenes, nitrenes/nitrenium ions, structure–activity relationships, *Salmonella typhimurium* 446
azo dyes, structure–activity relationships, *Salmonella typhimurium* 115
cooked meat/lamb, time and temperature effects, *Salmonella typhimurium* TA98, S9 mix 228
DNA adduct formation, metabolic activation, 6-nitrochrysene, *Salmonella typhimurium* 235
ellagic acid, dimethylnitrosamine, Ames test, S9 activity, hamsters 454
mushroom:*Tirmania pinoyi*, extracts, different solvents, Salmonella strains, human food screening 111
plasmid pKM101, genotoxicity, DNA repair 371
spectra, glutathione, L-cysteine, active oxygen species, *Salmonella typhimurium* strains 221
volatility 160
Mutagenicity testing,
carcinogenicity testing, mammalian cell mutation assays, letter to the Editor 325
flow cytometry, DNA damage, nucleoids, genotoxins, human mononuclear cells 35
fluctuation tests, heterogeneity, auxotrophic-growth enhancement, faeces, *Salmonella typhimurium*, *Escherichia coli* 126
metabolic activation, genotoxicity, *in vitro*, liver S9 microsomes, mice 335
rutacridone, rutacridone epoxide, acridone alkaloids, Salmonella/microsome assay, *Salmonella typhimurium*, *Ruta graveolens* L. 45
SOS Chromotest, DNA damage, urine samples, smokers, *Escherichia coli* strain PQ37, human 51
Mutagens,
water screening, micronucleus test, *Xenopus laevis* 12
Mutations,
glucose-6-phosphate dehydrogenase (G6PD), G6PD-deficient mutants, isolation and characterization, Chinese hamster cells 259
monosomies 487
mutational specificity, dimethylsulphate, DNA alkylation pathways, S_N1 and S_N2, *lac I* gene, *Escherichia coli* 230

Naphthofurans,
cytogenicity, DNA lesions, sister-chromatid exchange, human lymphocytes 27
National Toxicology Program,
short-term genotoxicity tests, multivariate statistics 412
Nitrenes/nitrenium ions,
azido-imidazoarenes, mutagenicity, structure–activity relationships, *Salmonella typhimurium* 446
6-nitrochrysene,
mutagenicity, DNA adduct formation, metabolic activation, *Salmonella typhimurium* 235
5-nitrofurans,
nifurtimox, antiparasitics, genotoxicity testing, Drosophila wingspot test 105
***N*-nitrosamines,**
antimutagenicity, betel quid, tobacco 154
***N*-nitrosodimethylamine,**
resistance, DNA repair, H4IIEC3 rat hepatoma cells, genotoxic products 292

P/N ratio,
polychromatic and normochromatic erythrocytes, erythropoeisis, micronucleus test, bone marrow toxicity, mice 420
Plasmid pKM101,
mutagenicity, genotoxicity, DNA repair 371
Porphyrins,
in vivo uptake in *Allium cepa* meristematic cells, DNA photodamage, photodynamic therapy 157
Precocene II,
genotoxicity, Drosophila wing spot test 216
Procarbazine,
deuterated analogues, genotoxicity, rats, *Salmonella typhimurium* 355
Psoralen,
multiplicity reactivation, mutagenesis, DNA cross-linking compounds, Fanconi's anaemia, herpes simplex virus 67
Pyrethroid insecticides,
cypermethrin, fenvalerate, cytogenetic damage, cultured human lymphocytes 72

Quantitation,
chromosomal mutations, mouse lymphoma *tk* locus, CHO *hgprt* locus 394

Resistance,
DNA repair, H4IIEC3 rat hepatoma cells, genotoxic products, *N*-nitrosodimethylamine 292
Reversion,
bacterial assays, bacterial growth stage, captan, folpet, Ames test, *Salmonella typhimurium* TA100 1
RNA staining,
Hoechst 33258, pyronin Y, classification of erythrocytes, fetal erythrocytes, micronucleus assay 190
Rutacridone,
rutacridone epoxide, acridone alkaloids, mutagenicity testing, *Ruta graveolens* L., Salmonella/microsome assay, *Salmonella typhimurium* 45

Short-term genotoxicity tests,
BALB/c 3T3 cells, transformation/mutation assay system, *in vitro* testing, non-genotoxicity, carcinogens 286
National Toxicology Program, multivariate statistics 412
Sister-chromatid exchange,
cell division delays, steroids, human lymphocytes 361
naphthofurans, cytogenicity, DNA lesions, human lymphocytes 27
SOS Chromotest,
monofunctional alkylmethanesulphonates, structure–activity relationships, *Escherichia coli*, *Salmonella typhimurium* 179
mutagenicity testing, DNA damage, urine samples, smokers, *Escherichia coli* strain PQ37, human 51
SOS-like responses, DNA damage, impaired recovery, radiosensitive fibroblasts, ataxia telangiectasia 271
Spindle poisons,
c-mitotic effects, aneuploidy, chromosome aberrations, mouse bone marrow cells 208
Stains,
Acridine Orange, Giemsa, bone marrow micronucleus assay, triple dose study, mouse 477
Steroids,
sister-chromatid exchanges, cell division delays, human lymphocytes 361
Streptomycin resistance,
'resistant' and 'dependent' mutants, DNA alteration, UV-irradiation, *Escherichia coli* 78

Transfection,
mutagenic and carcinogen effects 245
Transformation,
in vitro, ethylene oxide, gamma radiation; comparative studies, genotoxicity, C3H/10T1/2 mouse embryo fibroblasts, human 58
Tubulin assembly,
mitomycin C, chromosomal malsegregation, genotoxicity, *Saccharomyces cerevisiae* D61.M, porcine brain 39
Tumour development,
DNA methylation, mismatch repair, mutation, error correction, SCC30 cell line 463

UV-irradiation,
CHO mutant UV61, (6-4)photoproducts, cyclobutane dimers 140
DNA alteration, streptomycin resistance, 'resistant' and 'dependent' mutants, *Escherichia coli* 78
DNA repair and replication, unscheduled DNA synthesis, smokers, *in vitro*, lymphocytes 82
DNA repair induction, genotoxicity, metabolic activation, rat hepatocytes 457

Volatility,
mutagenicity 160

Water,
chlorine, sodium hypochlorite, monochloramine, clastogenicity, micronucleus test, newt larvae (*Pleurodeles waltl*) 170
water screening, genotoxicity, micronucleus test, *Pleurodeles waltl* 17
water screening, mutagens, micronucleus test, *Xenopus laevis* 12

X-rays,
adaptive response, chromosomal aberrations, human lymphocytes 87
dose–response parameters, cytokinesis, cytochalasin B, acentric fragments, micronuclei, human lymphocytes 265
